March 11, 2024

Dear Colleagues:

It is my great privilege to welcome you to the 13th **International Crisis and Risk Communication Conference (ICRCC)** held here in Orlando, Florida, USA—also known as the City Beautiful. This year's event marks an important moment of growth for us as the conference is now part of a bigger initiative, that is, the **International Crisis and Risk Communication Association (ICRCA)**. If you have not yet joined the ICRCA, I encourage you to do so. We want to ensure that your voice is heard as we develop and refine myriad means for communicating and collaborating across fields of endeavor, as well as across national and international borders. Members will have the opportunity to participate in our first ICRCA annual meeting over lunch on Wednesday.

I would like to highlight a few new events we've added to the conference this year. First is the **Design Thinking Workshop**, which will take place from 1:00-3:00PM on Monday. This highly interactive problem-solving session will focus on communication to prepare and educate employees for cyber events. If interested, be sure to register for the free event as seats are limited. Second is our **Breakfast with Scholars** that will take place from 7:15-8:30AM on Wednesday. If you are interested in having an informal discussion with one of the featured scholars over breakfast, be sure to register for this free event, as well. As always, we are delighted to have an array of featured panels throughout the conference, our **Bridge Award Reception** on Monday and **Bridge Award Luncheon** on Tuesday, as well as **Top Student Papers** panel on Wednesday afternoon. Finally, be sure to take time to visit with poster presenters and vote for the **People's Choice Award**.

In closing, thanks to the **Nicholson School of Communication and Media (NSCM)** and the **University of Central Florida (UCF)** for hosting the conference on the newly constructed downtown Orlando campus. Thanks to the **UCF Rosen College of Hospitality Management** for sponsoring the **Keynote and Plenary Session**, and a special thanks to the many volunteers who help make the conference a success. Finally, thanks to everyone participating in the conference this year. We hope you will find it informative and inspiring as you pursue your work related to risk, safety, and crisis communication.

Respectfully,

Dr. Deanna Sellnow
 Executive Director
 International Crisis and Risk Communication Association

UNIVERSITY OF CENTRAL FLORIDA

March 11, 2024

Welcome to the University of Central Florida!

On behalf of the University of Central Florida, it is my pleasure to extend a warm welcome to all the distinguished professionals, academics, students, and guests attending the 2024 International Crisis and Risk Communication Conference at the UCF Downtown Campus.

UCF is honored to be the site for this significant event, and it is with great enthusiasm that we welcome you to the UCF Downtown Campus. The Nicholson School of Communication and Media initiated and hosted the ICRCC from its inception through 2022. This year, we are delighted to continue as a Diamond Level Sponsor.

The conference serves as a unique platform that brings together professionals and academics in the field of risk and crisis communication. Over the years, the ICRCC has played a vital role in bridging the gaps between theory and practice, fostering collaboration, and advancing knowledge in areas such as risk and crisis communication, strategic communication, and instructional risk communication.

This year's sessions promise to be insightful and engaging, providing a forum for meaningful discussions and the exchange of ideas. As we navigate the complexities of crisis communication, your participation contributes to the collective effort in enhancing our understanding and approaches to these critical areas.

The University of Central Florida is committed to providing an environment that encourages learning, innovation, and collaboration. We trust that your experience at the conference will be both enriching and enjoyable.

Once again, welcome to the 2024 International Crisis and Risk Communication Conference. May your time here be filled with valuable insights, fruitful discussions, and memorable connections.

Cordially,

Robert Littlefield

Robert S. Littlefield, Ph.D.
Founding Director and Professor

ICRCC 2024 Conference Program

March 11 – 13, 2024

Monday March 11, 2024

**12:30-6:30 PM Onsite Conference Registration and Packet Pick Up
DPAC Lobby**

1:00-3:00 PM Room 106A Design Thinking Workshop: Risk and Crisis Communication to Prepare and Educate Employees for Cyber Events [Registration for this workshop is required.]

Preparing for a cyber-attack is imperative for every organization – in addition to keeping technological infrastructure up-to-date, both employee awareness and alert online behavior are critical components of any defense mechanism (Björck, Pugnetti, Casian, 2024). Organizations are investing in simulated phishing attacks and general communication, but messages are forgotten and the necessary change in awareness and behavior is not happening. How can organizations make the communication stick? How can experiential learning be triggered? What communication strategies, channels, messages, and messengers are necessary? On behalf of these companies (Allianz Switzerland and Mobiliar), we would like to invite academic scholars and practitioners to brainstorm and ideate possible solutions to this sticky problem.

3:45 – 5:00 PM Featured Panels on Bridging Practice and Research

Room 161

ICRCC Room Coordinator: Jennifer Cook, Executive Director, WUCF, USA

Panel 1 Thinking Together: WHO, Practitioners, & Researchers Bridging the Gap Between Evidence and Action During Emergencies

Moderator & Discussion Lead: Ben Duncan – Consultant (Belgium)

Panelists: Aizhana Dzhumalieva – American University of Central Asia (Kyrgyzstan), Audra Diers-Lawson – Kristiania University College (Norway), Brigitte Strahwald – LMU Munich (Germany) Cristiana Salvi - WHO-Europe (Denmark)

Summary: This panel begins with the assumption that having high quality, up-to-date evidence is critical for designing effective public health interventions, particularly in the context of RCCE-IM. A challenge is ensuring this information is, in fact, rapidly produced and high quality in nature. This panel will present recent examples of best practice from the WHO European Region of research/practice collaboration to produce rapid response evidence to inform RCCE-IM interventions. The panel will also lead a discussion on how to facilitate more RCCE-IM research and researcher/practitioner collaboration – including work done by the WHO European Regional Office's Technical Advisory Group on RCCE-IM to scope a research agenda. This moderated panel discussion features practitioners and researchers who are all members of the WHO European Regional Office TAG on RCCE-IM.

Room 169

ICRCC Room Coordinator: Sofia Salazar, UCF, USA

Panel 2 Risk and Crisis Communication in Wildland Fire Fighting.

Moderator & Discussion Lead: Joel Iverson – University of Montana (USA)

Panelists: David Flores – US Forest Service (USA), Rebekah Fox – Texas State University – San Marcos (USA), Jody Jahn – University of Colorado (USA), Satoris Howes – Oregon State University (USA), Emily Haire – US Forest Service (USA), Steven J. Venette – University of Southern Mississippi (USA)

Summary: Presenters will discuss the development and use of a research strategy to cultivate communities of practice to mitigate the risks associated with the catastrophic effects of wildfires on communities. This panel has two primary goals: (a) contribute theoretically to the understanding and application of communities of practice, specifically around risk management and (b) contribute to understanding in the form of lessons learned from the United States Forest Service.

Room 169A

ICRCC Room Coordinator: Rebecca Freihaut, UCF, USA

Panel 3 Strategic Crisis Communication and the Ukraine/ Russia War.

Moderator & Discussion Lead: Matthew Seeger – Wayne State University (USA)

Panelists: William Nowling – Michigan State University (USA), Doug Jordan – Joint Special Operations University (USA), Gigi Khaibakhmanova – University of Northern Iowa (Russia), Jeffrey Brand – University of Northern Iowa (USA), Alina Bargaoanu – SNSPA (Romania), Corina Buzoianu – SNSPA (Romania), Sonny S. Patel – Georgia State University (USA)

Summary: While wars are fought using military equipment and trained professionals, strategic communication and public relations are increasingly seen as a powerful, albeit under examined, weapon systems (Halloran, 2007, Khan & Pratt, 2022). Halloran notes that in international conflicts, strategic communication involves persuading allies and friends to offer support, persuading neutrals to remain so, persuading adversaries that you will prevail and persuading citizens to support the effort. Although strategic communication has likely always been a feature of war, conflicts in Vietnam, Afghanistan and Iraq have demonstrated its importance. Dimitriu (2012), for example, conducted an analysis of the conflict in Afghanistan and argued that "The heart of a strategic communication strategy is formed by a strategic narrative, a compelling storyline which can explain events convincingly and from which inferences can be drawn." Social media and the speed and width of diffusions has made strategic communication an even more powerful force in armed conflicts.

Recipient: Prof. Dr. Martin Löffelholz, Technische Universität Ilmenau (Germany)

Dr. Löffelholz is Professor of Media Studies and Head of the International Crisis Communication Research Group at the Ilmenau University of Technology in Ilmenau, Germany. He is former President of the Swiss German University in Jakarta, Indonesia. Since 2021, he has been a spokesperson for the DECIPHER research consortium, which unites researchers from around the world to examine the communication strategies of governments, public health agencies, and media journalists regarding the COVID-19 mega-crisis. Dr. Löffelholz is author or co-author of more than 400 academic publications, including 21 books. His research focuses primarily on issues of risk, crisis, and war communication, as well as organizational communication, journalism, and public diplomacy. His research is also informed by his professional experience as a former journalist and ex-soldier. He has taught in more than 30 countries worldwide, has trained journalists from more than 15 countries, and has more than three decades of experience advising governments, non-governmental organizations, and the private sector.

The Risk and Crisis Communication Section of ECREA is an associated partner of the ICRCA. It serves as a central interface for researchers in Europe and beyond who study risk and crisis communication across a variety of contexts, such as environmental, technological, organizational, and political domains. As part of a pan-European network of communication and media scholars, the Risk and Crisis Communication Section is interested in cross-border research and is open to a broad variety of theoretical lenses and methodological paradigms. It is also interested in a close exchange with practitioners, as it sees itself as an application-oriented research community. The Section meets annually, alternating between the general ECREA conference and the Section conference. Researchers and practitioners from all over the word are welcome to join the network and participate in its meetings as well as further activities.

Given the increasingly global and interconnected crises of our time, the goal of the partnership between the ICRCA and ECREA's Risk and Crisis Communication Section is to promote the shared field of research, exchange expertise and collaborate internationally for the benefit of theory, research, teaching and practice.

Title: *Challenges and Opportunities for Communicating Risk and Managing Crises in Entertainment, Hospitality, & Tourism Industries*

Moderator: *Dr. Deanna Sellnow, Clemson University (USA)*

The UCF Rosen College of Hospitality Management is the nation's leading college for hospitality education and research, ranked #1 in the nation and top 5 in the world by the 2023 ShanghaiRankings' listing of 500 of the world's top universities for hospitality and tourism programs. The college houses eight highly respected journals for hospitality and tourism in addition to the *Rosen Research Review*, an applied research magazine serving as a bridge between academic research and industry applications.

Committed to advancing knowledge, embracing innovation, and serving humanity through hospitality, the college stands out not only for its top rankings but also for its extensive range of programs, including undergraduate and graduate programs in diverse areas like hospitality management, event management, entertainment management, lodging and restaurant management, theme park and attraction management, and lifestyle community management. Uniquely positioned in America's top tourism destination—Orlando, FL, we educate the next generation of industry leaders through internationally recognized faculty, innovative academic programs, cutting-edge research and strong industry and community partnerships. Keynote Speaker: Dr. Alan Fyall, Associate Dean of Academic Affairs and 'Visit Orlando' Endowed Chair of Tourism and Marketing at the Rosen College of Advisory Hospitality Management, University of Central Florida (USA)

BIO: Dr. Fyall serves on the Board of TravelAbility, an organization dedicated to providing thought leadership in accessible travel, is Founding Editor of the *Journal of Destination Marketing & Management* (IF: 8.4), an elected Fellow of the International Academy for the Study of Tourism, where he currently serves as Second-Vice-President, and is a former Board Member of the Bournemouth Tourism Management Board (DMO). He has conducted many tourism destination development and management projects for clients in the UK, European Union, Africa, the Caribbean, USA, and Southeast Asia. Clients include the ESRC (UK), Grant Thornton, Ernst & Young, the Commonwealth Secretariat, the Malaysian Government, the Supreme Commission for Tourism and Antiquities (Saudi Arabia), World Travel & Tourism Council and The Ocean Panel.

Alan has published over two hundred peer-reviewed academic outputs including twenty-seven books and has an h-Index of fifty, an i10-index of 109 and over 20,000 citations. His books include *Marketing for Tourism & Hospitality: Collaboration, Technology and Experiences* (Abingdon, Routledge), *Tourism Principles & Practice* (Sixth Edition) (Harlow, Pearson Education) and *Tourism Marketing: A Collaborative Approach* (Clevedon, Channel View Publications).

Keynote Title: Tourism – Forever Vulnerable but Always Resilient (....so far)

Abstract: Crises and disasters are not new to tourism with the industry needing to become ever more resilient to the “shocks” and “stressors” it continues to face. This presentation will introduce the relationship between tourism, crises and disasters and show how the recent COVID-19 pandemic impacted visitation across the world, and more locally here in Central Florida. What will become apparent are how different types of destinations suffer more acute impacts than others, the imbalance in the world between developed and developing-nations, and those systemic vulnerabilities that persist, and the responses required to further the resilience of tourism as a sustainable industry for the future.

Invited Panelists:

Dr. Frida Bahja, Director of Research, Experience Kissimmee
Limardo Lambrano, Field Marketing & Marketing Analytics, Hyatt Hotels
Jeremy Fairley, Senior Partner Customer Success, ADARA A RateGain Company
Felipe Robine, Director, Leisure Travel, Worldwide Sales at BWH Hotel Group®

Breakout Session 1***Room 161 ICRCC Room Coordinator: Laura Bouteinen, UCF, USA******Session 1A Overcoming Barriers to Researcher/Responder Collaboration in Live Emergencies: Experiences from the COVID Pandemic and Other Recent Emergencies******Moderator & Discussion Lead: Audra Diers-Lawson - Kristiania University College (Norway)******Panelists: Ben Duncan – Consultant (Belgium), Riko Kimoto – Asia Europe Foundation (Japan), Timothy Sellnow – University of Central Florida (USA), Brigitte Strahwald – LMU Munich (Germany)***

Summary: The ICRCC has long valued its focus on 'bridging the gaps' between scholars, research, and practice. This panel's aim is to create an open dialogue between scholars and public health practitioners addressing how to build effective collaborations. Professor Audra Diers-Lawson will conduct a moderated discussion with a panel of practitioners and researchers from the Americas, Asia, and Europe before opening the discussion to include session audience members. The panelists will discuss topics like: (1) building a consensus about the importance of collaborations; (2) discussing the practical barriers and challenges in such collaborations; (3) identifying examples of successful experiences; and (4) suggesting pragmatic approaches to network and collaboration building. With these topics in mind, the panel will also actively interrogate one of the assumptions made – that the collaboration provides value to both scholars and practitioners. However, this assumption is seldom actively discussed. Thus, this panel hopes to push the conversation beyond 'bridging the gaps' by focusing more specifically and concretely on the concept of 'value-creation' in strategic alliances or relationship building. By the end of the panel discussion, the aims are to: (1) more clearly define what value each part of a scholar/practitioner collaboration should create and (2) identify benchmarks for success and failure of the collaborations.

Session 2A Crisis Communication and Water Contamination

Respondent/Discussion Facilitator: Matthew Seeger, Wayne State University (USA)

Panelists: Morgan Getchell – Morehead State University (USA), Xianlin Jin – University of Toledo (USA), Henry S. Seeger – University of Michigan (USA), Lahne Mattas-Curry – University of Maryland (USA), Khairul Islam – State University of New York at Oswego (USA), Taejin Jung – State University of New York at Oswego (USA), Richard Smith – Wayne State University (USA), Elizabeth Carlson – Central Michigan University (USA)

Summary: Several major environmental crises, including lead poisoning and Legionella in the City of Flint (Day et al., 2019), chemical spills in West Virginia (Getchell & Sellnow, 2016), and hazardous algal bloom in Toledo, Ohio (McCarty et al., 2016) were associated with contaminated drinking water. The recent East Palestine, Ohio Train derailment raised significant concerns about long- and short-term health impacts, the role of response groups and agencies, including the impacted communities and agencies including the Environmental Protection Administration (Dinneen & Hsu, 2023, Sun, 2023). Access to clean and safe water is further problematized by ongoing water shortages driven by climate change and overuse. Major environmental communication challenges are associated with water contamination. These and other contamination events threaten public health, requiring communication including public warnings, information about response, risk messages about mitigation and health impacts, and explanations about cause and responsibility (Day et al., 2022; O'Shay et al., 2020).
